## SUMMARY

Full-stack developer passionate about building efficient web applications and eager to grow with a dynamic team.

Dedicated to delivering clean, scalable solutions and improving every day through hands-on experience.

## TECHNICAL SKILLS

**Frontend** – HTML, CSS, JavaScript, React JS, TypeScript, MUI

**Backend** - Python, FastAPI, Basic Django

**Database** - PostgreSQL, MongoDB

**AI/ML** - LangChain

**Tools & Platforms:** Git, GitHub, Bitbucket, Jira

## EXPERIENCE

### Full Stack Developer

Jan – Dec 2025

*Fladdra Technologies*

Pune, India

- Built responsive UI components in React.js, improving page load time and user engagement by 30%
- Designed and deployed RESTful APIs with FastAPI, enabling secure authentication and smooth data operations across the platform
- Developed and maintained admin & user panels, streamlining workflows and reducing manual operations by 40%.
- Collaborated with cross-functional teams to integrate frontend and backend features, ensuring seamless user experience.

## PROJECTS

### [Live] Panasonic Digital Returns

Sep 2025

**Tech Stack:** React, Django, PostgreSQL

- Developed backend APIs (Django + DRF + PostgreSQL) for Panasonic's digital return web application (React JS + TailwindCSS).
- Implemented workflows for inspection creation, segregation, and RTV (Return to Vendor) management.
- Built front-end modules in React and React Native for inspection dashboards and submission flows.

### [Live] CareerView

Mar 2025

**Tech Stack:** React, FastAPI, MongoDB, LangChain

- Built a complete hospital management system with role-based login (Admin & User).
- Integrated AI chatbot for enhanced user interaction, improving query resolution by 40%.
- Designed an Admin Dashboard to track hospital records and form statuse.

### [Live] Hospital Management System

Feb 2025

**Tech Stack:** React, FastAPI, MongoDB, JWT Authentication

- Developed an AI-driven mock interview & video assessment platform with dynamic Q&A generation.
- Implemented real-time transcription and scoring pipeline, with role-based dashboards for students, trainers, and admins.
- Designed dashboards to track career progress and assessment results

### [Live] CloudsNetworking

Apr 2025

**Tech Stack:** React, FastAPI, PostgreSQL

- Built APIs for courses, syllabus, authentication, blogs, and feedback.
- Integrated email services for contact forms and enrollment processes.
- Designed Admin and User Panels to streamline operations.

## EDUCATION

Pursuing Bachelor of Science in Computer Application In Savitribai Phule Pune University (SPPU)

Jul 2024
