- **Yazdaan Academy (Full Stack Project)**

Developed a full-stack e-learning platform using React for the frontend and Django with PostgreSQL for the backend. Implemented RESTful APIs for handling transactions, coupon management, user authentication, feedback collection, and course lecture delivery. The frontend includes a responsive user interface for students to browse and access courses, along with an admin panel for managing courses, lectures, feedback, and user activity. The platform ensures secure user access with JWT-based authentication and supports discount coupon functionality for promotional campaigns.
