Summary

Full-stack developer with strong frontend expertise and hands-on experience in React, React Native, FastAPI, PostgreSQL, and MongoDB. Currently working as a Frontend Developer at Microzen Technologies, leading UI development and delivering scalable applications. Skilled in building responsive dashboards, REST APIs, and AI-powered features using LangChain and Gemini.

Technical Skills

- **Frontend:** HTML, CSS, JavaScript, TypeScript, Angular, React, React Native, Tailwind CSS
- **Backend:** Python, FastAPI, Django (Intermediate), REST APIs
- **Database:** PostgreSQL, MongoDB
- **Tools Technologies:** Git, GitHub, Bitbucket, Jira, Linux, LangChain

Experience

Frontend Developer Mar 2026 – Present
Microzen Technologies Pune, India

- Leading frontend development using React.js and React Native, delivering scalable, high-performance, production-ready, enterprise-grade and highly optimized applications.
- Managing multiple projects and collaborating with cross-functional teams for efficient delivery and scalable architecture, ensuring seamless coordination and optimized development workflows.
- Working with modern frameworks like Next.js and contributing to Angular-based projects, while optimizing UI/UX performance, ensuring responsive design and seamless user experience.

Full Stack Developer Jan 2025 – Mar 2026
Fladdra Technologies Pune, India

- Built and optimized responsive UI components using React.js, improving performance and user engagement, ensuring smooth interactions and consistent cross-browser compatibility.
- Developed and deployed secure RESTful APIs with FastAPI for authentication and data operations.
- Designed and enhanced admin and user dashboards, reducing manual processes and improving efficiency, ensuring streamlined workflows and better data visibility.

Projects

Panasonic Digital Returns 2025
Tech Stack: React, Django, PostgreSQL

- Developed backend APIs using Django + DRF for Panasonic's digital return system, improving workflow automation, enhancing system reliability and reducing manual intervention efforts.
- Implemented modules for inspection creation, segregation, and RTV management.

Nuytic AI (Live Project) 2026
Tech Stack: React Native, TypeScript, Expo, TanStack Query, Zustand, NativeWind

- Built a cross-platform health app with AI-powered meal scanning, nutrition estimation, and personalized meal planning, backed by resumable onboarding and secure OTP auth.
- Designed a reusable 20+ component UI system with full English/Arabic i18n, RTL support, and subscription-based feature gating, ensuring scalability, consistency, and seamless user experience.

CloudsNetworking (Live Project) 2025
Tech Stack: React, FastAPI, PostgreSQL

- Developed REST APIs for courses, syllabus, blogs, feedback authentication with integrated email automation, ensuring secure data handling and efficient communication workflows.
- Created responsive Admin User panels for simplified workflow management, ensuring efficient navigation and improved overall user experience, across multiple modules and platforms.

Certificate

Python Web Development Bootcamp: From Beginner to Full-Stack Developer Apr 2025
