Summary

Backend-focused full-stack developer with hands-on experience in Python, FastAPI, and Django, backed by strong frontend skills in React and React Native. Experienced in designing and deploying REST APIs, working with PostgreSQL and MongoDB, and deploying and managing applications on AWS (EC2, S3) using Docker. Currently working as a Software Engineer at Microzen Technologies while actively building backend and cloud infrastructure skills through production projects.

Technical Skills

Backend: Python, FastAPI, Django, REST API Design, LangChain

Databases: PostgreSQL, MongoDB

Cloud & DevOps: AWS EC2, AWS S3, Docker, Linux, GitHub Actions (CI/CD), Nginx

Frontend: React, Next.js, TypeScript, JavaScript, HTML, CSS, Tailwind CSS

Tools: Git, GitHub, Bitbucket, Jira, Postman

Experience

Software Engineer Mar 2026 – Present

Microzen Technologies Pune, India

- Leading frontend development using React.js coordinating closely with backend teams on API contracts and data flow for scalable, production-ready applications.
- Managing multiple projects across a cross-functional team of 8+ engineers, ensuring efficient delivery and scalable architecture.
- Working with Next.js and Angular-based projects, optimizing performance and integration with backend services.

Full Stack Developer Jan 2025 – Mar 2026

Fladdra Technologies Pune, India

- Developed and deployed 50+ secure RESTful API endpoints with FastAPI for authentication and data operations.
- Designed backend logic for admin and user dashboards, replacing manual processes with automated data workflows.
- Built and optimized responsive UI components using React.js, ensuring smooth integration with backend APIs and consistent cross-browser compatibility.

Projects

Panasonic Digital Returns 2025

Tech Stack: Django, PostgreSQL, React

- Developed backend APIs using Django + DRF for Panasonic's digital return system, improving workflow automation and system reliability.
- Implemented backend modules for inspection creation, segregation, and RTV management.

Nuytic AI ([Live Project](#)) 2026

Tech Stack: React Native, TypeScript, Expo, TanStack Query, Zustand, NativeWind

- Built a cross-platform health app with AI-powered meal scanning, nutrition estimation, and personalized meal planning, backed by resumable onboarding and secure OTP auth.
- Designed a reusable 20+ component UI system with full English/Arabic i18n, RTL support, and subscription-based feature gating.

HealthyEats – Healthy Meal Delivery E-Commerce Platform ([Live Project](#)) 2026

Tech Stack: Next.js 16, React 19, TypeScript, PostgreSQL, Supabase, Tailwind CSS, CyberSource

- Developed a full-stack meal ordering platform spanning user, admin, and partner dashboards with meal plans, cart/checkout, coupons, and dietary management.
- Implemented authentication with email verification, OTP, and password reset alongside automated transactional emails, and integrated the CyberSource payment gateway with commission and payout tracking.

Certificate

Python Web Development Bootcamp: From Beginner to Full-Stack Developer — Apr 2025

Education

Bachelor of Science in Computer Applications

Savitribai Phule Pune University — Pune
